Product Formulation Statement for Documenting Vegetables and Fruits in School Meal Programs

Program operators should include a copy of the label from the purchased product package in addition to the following information on letterhead signed by an official company representative.

Product Name: Code No.:

¹ FBG yield = either Servings per Purchase Unit column or Additional Information column, as applicable. ² FBG calculations for vegetables are in quarter cups. See next page for Quarter Cup to Cup Conversions.						Total Cups Beans/Peas (Legumes)		
 Vegetables and vegetable purees credit on volume served. Tomato paste and puree credit as a calculated volume based on the yields in the FBG. At least ½ cup of recognizable vegetable is required to contribute toward a specific vegetable subgroup. 						Total Cups Dark Green		
 Pasta made from vegetable flour(s) may credit as a vegetable even if the pasta is not served with another recognizable vegetable. The other vegetable subgroup may be met with any additional amounts from the dark green, red/orange, and beans/peas (legumes) vegetable subgroups. 					Total Cups Red/Orange			
 Program operators may offer any vegetable subgroup to meet the total weekly requirement for the additional vegetable subgroup. Raw leafy green vegetables credit as half the volume served in school meals (example: 1 cup raw spinach credits as ½ cup dark green vegetable). 						Total Cups Starchy		
 Legumes may credit toward the vegetables component or the meat alternates component, but not as both in the same meal. The Program operator will decide how to incorporate legumes into the school meal. However, a manufacturer should provide documentation to show how legumes contribute toward the vegetables component and the meat alternates component. The PFS for meats/meat alternates may be used to document how legumes contribute toward the meat alternates component. 						Total Cups Other
